Match:-			
(A)		(B)	
7. in fact , you see	...	A-	to introduce a new topic
8. talk someone out of it	...	B-	CV
9. Resume	...	C-	used to add information
	...	D-	to convince to do something different

Match:-			
(A)		(B)	
10. currency	...		
11. blueprints	...		
12. poverty	...		
			
		A	B
		C	D

What is CLIMATE CHANGE?

What is CLIMATE CHANGE? Climate is the weather, such as temperature and rainfall in a region. For example, the temperature in the Amazon is always high and it rains almost every day. NASA scientists tell us that Earth's surface is warming up. Burning fossil fuels (coal, oil, gas) releases greenhouse gases, particularly carbon dioxide and methane. Cars, factories, power stations, farms, heating our homes - all these everyday things contribute to climate change. It is a problem because as Earth warms up, the ice at the North and South Poles melts, seas rise and land is lost. Forests heat up and then burn.

Circle (T) for true And (F) for False		
13. It rains a lot in the Amazon.	T	F
14. Climates describes weather condition.	T	F
15. Earth is cooling down.	T	F
16. Most scientists say that global warming is caused by natural events.	T	F
