1 Listen and Discuss

1. How long do you think these inventions have been around?
2. How have these things changed people's lives?
3. Which of them can't you live without?

1. Printing press in 1440, computer in 1953 and camera in 1975.

2. printers enabled people to share knowledge more quickly and widely, cameras also allowed many people to view them. Computers allow huge amounts of information to be stored in a small space. They also allow a person to calculate mathematical problems with ease.

3. I can live without camera and elevator.

Which computer is a PC? When did PCs become popular? When did people use computers like the one in the black-and-white picture? What adjectives do you think describe that computer? huge and slow.

How is the laptop computer different from the older computer? smaller, faster, lighter, and more features.

Johannes Gutenberg 😊 look at the pictures of the printers.

Who is Johannes Gutenberg? Where was he from? When did he live? he invented the printing press. Ask: How are printers different nowadays? small and portable.

😊 the TVs: *When did people first buy TV sets? When did they become common in homes? How are TVs different nowadays? digital and color.*

The stove and microwave: Does the stove have an oven? Where is it?

😊 point to it. *Which came first, the gas stove or the electric stove? What heats and cooks food the fastest? microwaves.*

😊 cameras: *What did people need to buy for their cameras before digital cameras? film. What makes one digital camera different from another? megapixels.*

😊 the cell phones: *When did cell phones first appear? How much do you think the older cell phone weighed? How much do you think it cost? How long can you talk on your cell phone before you have to recharge it? How long do you think you could talk on the older cell phone before you had to recharge it?*

1 Listen and Discuss

What information do you found surprising?

Did you think that any item was invented before it actually was?

When inventions became common in your country.

Some dates in this article are based on usage in the U.S., which may differ from other parts of the world.

1 Listen and Discuss

1. How long do you think these inventions have been around?
2. How have these things changed people's lives?
3. Which of them can't you live without?

INVENTIONS

Many inventions aren't as old as you think. The following inventions are part of people's everyday lives, but some haven't been around for all that long. Read about their history. Does any of the information surprise you?

PRINTERS

Mass printing has been around since Johannes Gutenberg invented movable type and the printing press in 1440 in Germany. Nowadays, small, portable, high-tech printers can be found in offices and homes everywhere.

CAMERAS

Digital photography hasn't been around for that many years. In 1975, Steven Sasson, an engineer at Eastman Kodak, captured a black-and-white image on a digital cassette tape at a resolution of .01 megapixels. Before that, cameras used rolls of film to produce a photograph. George Eastman introduced rolls of film to the public in 1888 for use in his box camera.

COMPUTERS

Computers have changed the lives of so many people. The IBM 701 computer produced in 1953 was huge, slow, and took up an entire room. It was the first computer that was successfully sold to businesses. Smaller PCs came into widespread use in the 1980s. Over the last few years, laptop computers have become smaller, faster, and lighter, and they contain a greater number of features.

TELEVISIONS

Television has been around for a long time. The television set has become a common household device. It first became commercially available in the late 1930s, and black-and-white TVs became widespread in homes in the 1960s. Nowadays, we have digital color TVs and even mirrors that are also TV screens.

CD2, T8

العامية

SG3 U5
Page 48 & 49

STOVES AND OVENS

The first successful gas stove appeared in 1826, and the first electric stove in 1891. The microwave oven was invented by accident in 1946, when engineer Percy Spencer realized that microwaves could heat and cook foods faster than conventional ovens. The first microwave oven for use in homes was produced in 1967.

CELL PHONES

Portable cellular phones first appeared in the late 1970s. The early model was called "the brick." It weighed 2 pounds (907 grams), offered just a half hour of talk time for every recharge, and sold for \$3,995. Even though it was clumsy and expensive, consumers lined up by the hundreds to buy the first cellular phones as soon as they hit the market. Since then, phones have gotten smaller and much lighter, and they have become a necessary part of everyday life.

Quick Check

A. **Vocabulary.** Find six words in the article that relate to technology.

B. **Comprehension.** Answer about the inventions.

1. How long has IBM produced commercially successful computers?
2. Has printing been around for a long time?
3. How long have TV sets been common in homes?
4. How long ago did the first microwave ovens appear in homes?
5. How long have cameras been on the market?
6. For how many years have people had cell phones?

2 Pair Work

Ask and answer about the inventions.

- How long have people used cell phones?
- They've used them since the seventies.
- How long have you had a computer?
- I've had a computer for a long time.

INVENTIONS

Many inventions aren't as old as you think. The following inventions are part of people's everyday lives, but some haven't been around for all that long. Read about their history. Does any of the information surprise you?

5 Since When?

brick
household

printer
microwave oven

clumsy
image

conventional
huge

device
light

My aunt was at my house yesterday. She and my mom made cookies. I noticed that my mom never uses the (1) microwave to make the cookies. My mom says that some

things bake better the old-fashioned way, in a (2) conventional oven. That's why a lot of (3) household kitchens today have both types of oven.

Cell phones are very small today. And they have always been small. Well, that's what I thought! Then my older brother showed me one of the very first cell phones. My father had one in a box in the garage. It was not small at all! It was big and (4) clumsy. And when my brother handed it to me, I almost dropped it because it was so heavy.

brick
household

printer
microwave oven

clumsy
image

conventional
huge

device
light

And that's why people called it the (5) brick. It's

amazing how our cell phones today are so small and so

(6) light.

My new laptop computer is really amazing. It is so small and fast. I

love it. I really only needed one other (7) device to go with

it. I needed a (8) printer. But I didn't have to buy it.

The store gave me one when I bought the laptop. What a deal!

My parents just bought a new TV. It's a big screen TV, and that means that the screen is (9) huge! It's

awesome! The (10) image on the screen is

crystal clear and the sound is amazing.
