_____.

F. Supply the missing letters

Inv_nt_on / comp_ter / pr_nter / c_mera / tel_vision / st_ve / ov_n / c_ll_ph_ne / su_tcse

Reading

Read the text and answer the questions. Choose the best answer to each question.

The Ballpoint Pen

Ballpoint pens have not been around for very long. John Loud invented the first ballpoint pen in 1888. Before the invention of ballpoint pens, people had to dip their pens into ink when they were writing. This made writing slow. Also, sometimes too much ink made the writing messy. Ballpoint pens were the first pens that did not need to be dipped in ink.

Loud's invention was wonderful, but the design was still not perfect. Sometimes the pen did not get enough ink, and sometimes it got too much ink. Other inventors continued to work on the design of the ballpoint pen to improve it. For the next 30 years, inventors created over 350 kinds of ballpoint pens. But, still the pens did not work very well, and people did not buy them.

It wasn't until 1935 that Ladislav Biro and his brother developed an improved ballpoint pen in Hungary. Today, in the U.K. and Australia, some people call ballpoint pens *biros* after their inventor.

1. Ballpoint pens have been around since _____.
A. 1800 B. 1888 C. 1910 D. 1935
2. Before ballpoint pens, writers had to _____.
A. use their fingers B. use pencils C. dip their pens into ink D. dip their pens into water
3. The problem with Loud's invention was it _____.
A. was too heavy B. didn't work during the day C. was the use ink D. was too expensive
4. Some British people call ballpoint pens _____.
A. louds B. pencils C. inks D. biros
5. People have been using ballpoint pens for _____.
A. over 100 years B. less than 100 years C. 1888 D. 1935
