The end

Language Builder

Explain some of the computer terms on pages 64 and 65.

work online = connected to the Internet

surf the Internet = explore different sites on the Internet, usually not looking for anything specific

write an email = communicate with someone by typing and sending a letter on a computer

Teaching Tip

When a student makes a mistake answering a question, don't correct it immediately. Use a look or a gesture to indicate the answer isn't correct. Then give the student a chance to correct it himself. If he or she is having a problem, say to another student: ***Can you help (name)?*** This helps students become more independent learners.

Additional Activity

Bring, or have students bring, magazine pictures to class that show people doing different things. Arrange students in groups and give them a stack of pictures. Students take turns describing their pictures to the group. For example, they may say sentences like the following: *This man is sitting in a chair. The man is driving a car.*

- As of 2012, the top five countries where the most people use the Internet were: 1. Iceland (96% of the population); 2. Norway (95%); 3. Sweden (94%); 4. Netherlands (93%); and 5. Luxembourg (92%).
- Although only 42% of people in China use the Internet, they have the world's largest number of Internet users per country, with over 568,000,000 users. There are over 254,000,000 Internet users in the U.S., which accounts for 81% of the population.
