⭐ Composition 1 ⭐

✎ **Write an assay about (advertisement) using the notes below :**

Guided words: communication - promote - product - organizations – distributed – resonate – desires – consumers .

Advertisement

An advertisement is a form of communication that aims to promote or sell a product, service, or idea. It is created by businesses or organizations and is distributed through various media channels such as television, radio, print, and digital platforms. Effective advertisements are often creative, memorable, and designed to resonate with the needs and desires of the intended consumers.

✎ **Write an assay about (Communication Approaches) using the notes below :**

Guided words: methods - convey - visual – strengths - weakness – message – audience – receiving

Communication Approaches

Communication approaches refer to the different methods and styles used to convey information and ideas. These can include verbal communication, written communication, nonverbal communication, and visual communication. Each approach has its own strengths and weaknesses, and choosing the right approach depends on the message being conveyed and the audience receiving it.

⭐ Composition 3 ⭐

✎ **Write an assay about (Making Mistakes) using the diagram below :**

Guided words: natural - recognize - opportunities – acknowledging - improvement - choices – responsibility – strive

Making Mistakes

Making mistakes is a natural part of the learning process. It's important to recognize that everyone makes mistakes and that they can be valuable opportunities for growth and improvement. By acknowledging our mistakes, we can learn from them and make better choices in the future. It's okay to make mistakes as long as we take responsibility for them and strive to do better next time.

⭐ Composition 4 ⭐

✎ **Write an assay about (Cities of Future in Saudi Arabia) using the notes below :**

Guided words: envision - environmentally - renewable - efficient - architecture - traditional – elements – innovative.

Cities of Future in Saudi Arabia

In the future, I envision cities in Saudi Arabia to be modern ,with advanced technology. These cities will be designed to be environmentally friendly, with green spaces, renewable energy sources, and efficient public transportation systems. The architecture will blend traditional Saudi Arabian elements with cutting-edge design. Overall, the cities of the future in Saudi Arabia will be vibrant and innovative
