A	go	B	went	C	gone	D	going
---	----	---	------	---	------	---	-------

Kon-Tiki voyage

Norwegian explorer Thor led the Kon-Tiki voyage. It was a huge success and proved beyond doubt that Polynesia could have been settled from South America. One of the great mysteries of anthropology is how Polynesia-a vast pseudo-country in the Pacific spread triangularly between Rapa Nui, Hawaii and New Zealand-came to be inhabited by people with similar customs, cultures and, notably, languages. Many theories one theory, advanced in the 1930s is that the Islands were populated systematic from South East Asia. However, many remained unconvinced, including a Norwegian Explorer and Ethnographer by the name of Thor Heyerdahl. What Happened?

The Crew

Thor set about assembling a crew, each of which could bring a useful a long and treacherous voyage – and it was not long before he would found his team. In total, the six-man crew consisted of five Norwegians and one Swede. On August 7th, the raft struck a reef and eventually beached on an uninhabited islet off the coast of Raroia atoll. After a few days, washed up flotsam from the raft alerted villagers nearby who then arrived on canoes to rescue the voyagers. They were taken to Tahiti by a French boat.

A. Write (T) for true And (F) for False

1. Thor is a Norwegian.	T
2. The crew are 5 persons.	F
3. The raft stuck a mountain	F

B. Choose the Correct meaning:

1. voyage =					
A	By plane	B	By car	C	Long journey , sailing by ship
2. crew =					
A	villagers	B	team	C	inhabitation
