Read the text and answer the questions:

The Blue Whale is the largest animal in the world. It grows up to thirty- three meters in length and may weigh as much as 130,000kilograms. It is even bigger than the huge animals that lived on earth long ago. Some people think that the Blue Whale is a fish because it lives in the sea and has a tail like the tail of a fish. However, it is not a fish. Fish breathe water but Blue Whales breathe air. They can stay under water for about an hour but then they have to come to the surface to breathe. The Blue Whale has a thick coat of fat under its skin. This acts as a blanket to keep it warm. The number of Whales in the sea is becoming less every year. This is because men hunt them and kill them, for almost every part of a Whale's body can be used to make something useful.

- 1. Why do some people think that a Whale is a fish?
- 2. Is the whale the largest animal in the world?
- 3. Choose the correct answer:

- 1. Whale may grow to be ----- long.
 - a. 33metres b. 30 feet c. 7 or 8 meters d. 100 meters
- 2. The layer of fat under the whale's skin -----
 - a. helps it to float. b. keeps its blood warm. c. helps it to breathe. d. keeps its blood cool.

To: *Talk and Text* Cell Phone Company@email.com

From: Michael Reed@email.com

Subject: Complaint

Dear *Talk and Text* Representative,

I am writing to you to complain about my new cell phone and service plan. I bought a new cell phone from *Talk and Text* last month, but the phone is already broken. The instructions say that I can take pictures with it and store them on my phone, but when I take a picture, it is erased after a few minutes. I would like to return this phone and get a new one without a charge. Also, my text messaging plan needs to be changed. I thought my plan was for unlimited texting, but I just received a bill for all of the texts I sent last month. I do not think that I should have to pay this bill because my service contract with *Talk and Text* says that I have unlimited texting. Please respond to this email, or call me at 326-555-8125.

Sincerely,

Michael Reed

Curling

Curling was made an official sport in the Winter Olympics in 1988. When spectators watched the first curling match in the Olympics, many people in the audience did not know anything about the game. They thought that it was a new sport. However, in spite of the fact that curling is little-known, it has been around for hundreds of years.

In the sport of curling, a team of players slide stones across the ice to reach a target spot. The stones are made of granite, a naturally-occurring hard rock. Each team throws eight stones. The stones that are closest to the target spot gain points for their team.

The name curling comes from the movement of the stones on the ice. When a stone was thrown, it would often curve, or curl, as it slid across the ice. This game involves more skill and strategy than it first appears. In fact, good players spend so much time thinking about where to throw their stone that curling has been referred to as “chess on ice.” The stones need to be thrown skillfully to land in the target spot.

In the 1500s, curling was a recreational sport in Scotland. Friends and family gathered on frozen lakes, or *lochs* to play. They used ordinary flat stones that they gathered from the ground. The first curling club was established in Scotland in 1668. The first curling club in the United States was founded in 1830. Today, curling is played in many countries around the world, including Canada, the U.K., the U.S., Norway, Sweden and Japan. Even though curling is an Olympic sport, it can be played by almost anyone.
